# SHOPIFYFD

FOR SHOPIFY

DON'T BE SHOCKED IF THE  
ONLY THING IN THIS GUIDE  
SO FAR IS JUST THE COVER...

A SUPER **ROUGH** GUIDE ON  
HOW TO USE SHOPIFYFD TO  
MAKE YOUR DASHBOARD  
MORE AWESOME.

# ERR, MISSING SOMETHING?

The documentation and help guides for ShopifyFD is under development. There's not a lot to see here yet so consider this file a placeholder for now...

Current features:

- Inline metafield editor for Products, Product Variants, Pages, Articles, Customers, Custom Collections, Orders and Shop
- Copy and paste your Shipping Rates settings
- One click backup for page and products -- for those just in case moments!
- Jump to open orders with a single click -- click on the counter
- Quick remove all / add all tags on product page
- Show Variant IDs in product listing.
- Purge HTML button to absolutely remove any html from the description box. Handy when copy over the madness from a word file.
- Images to metafields. Saves all image paths in the description box to a metafield. Super handy for developers.
- Jump to page feature for quick page editing. No more multiple clicks to open a different page to edit.. Now also includes linklists and products.
- Adjusted layout to squeeze things in without wasting as much space.
- Add some quick shortcut buttons for regular tasks
- Copy and paste metafields between products
- Bulk asset file uploads Drag and drop goodness.
- Bulk metafield creation
- Bulk product tag editing
- Option to show SKU on product listing page
- Get emails from recent orders
- Show items ordered when hovering over orderID
- Create linklists for all collections, all products, or all vendors
- Autosave on product pages.

**YEP, THIS IS THE LAST PAGE.  
NOTHING TO SEE HERE...**
